# VALUES & SUSTAINABILITY

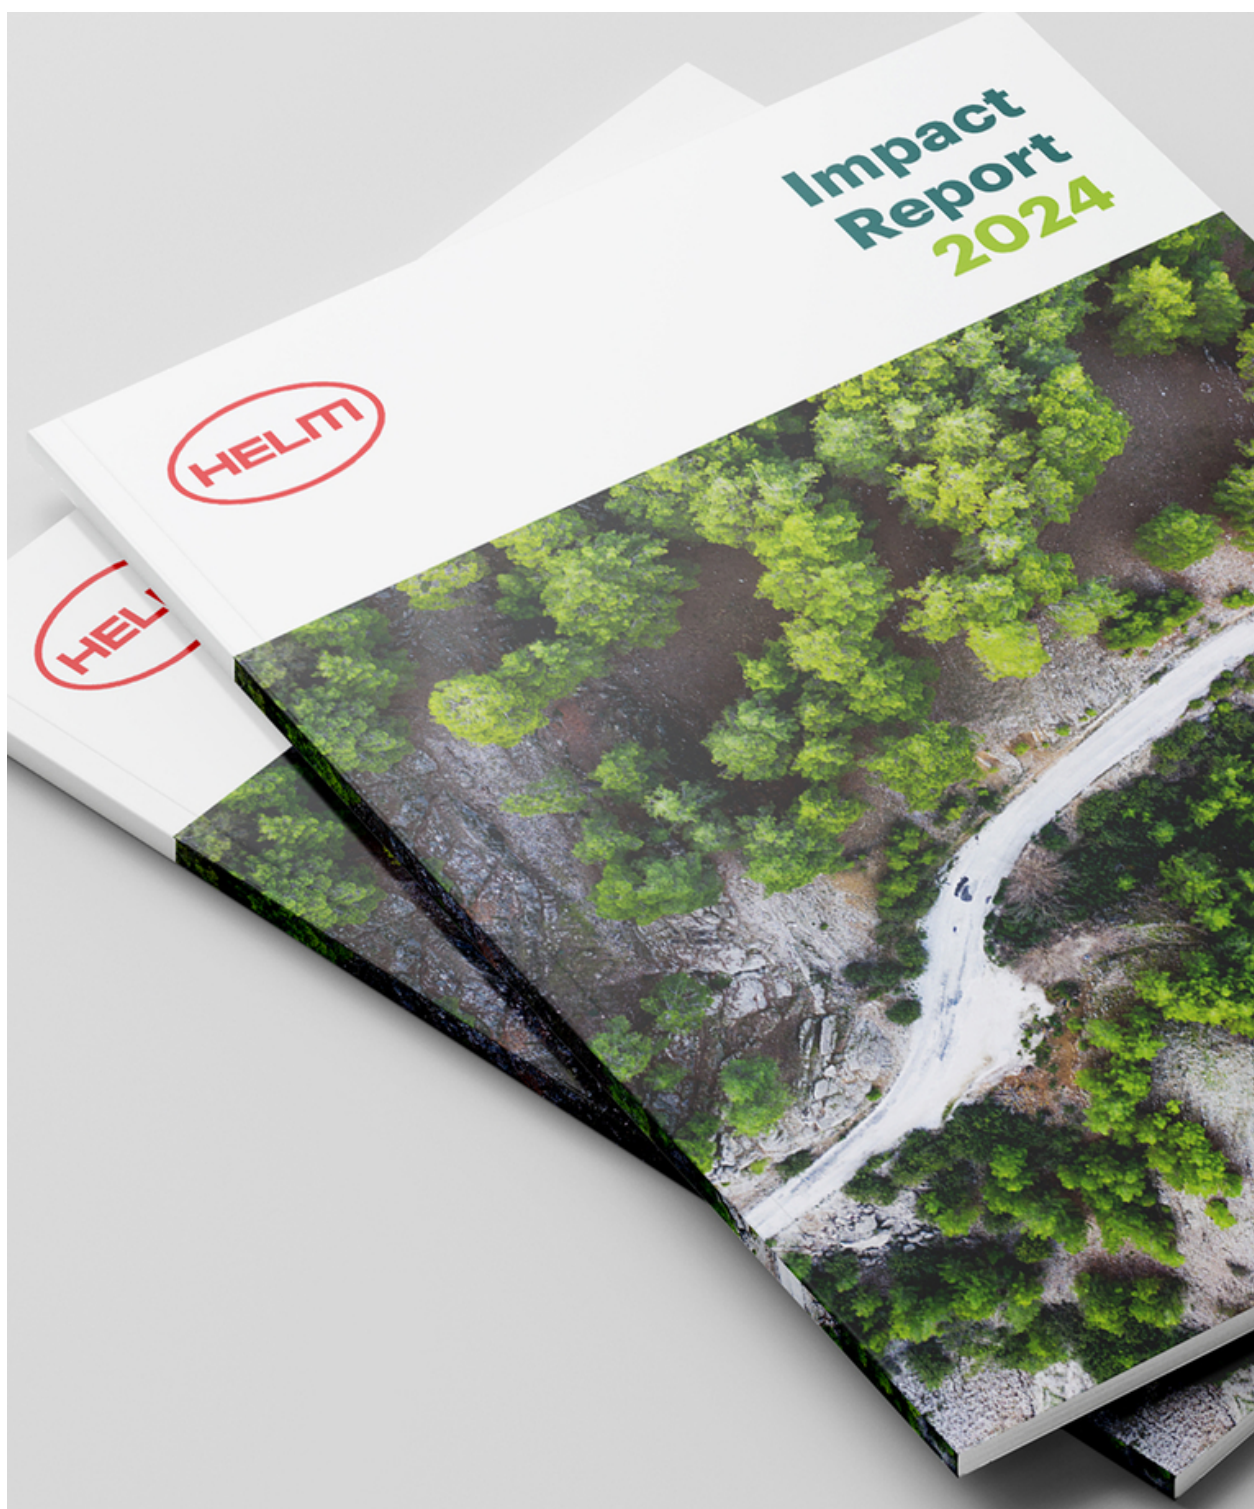

As a traditional family business, it is part of HELM's DNA to think and feel in strong values, to act for future generations and to take responsibility. We work hand in hand with our partners on the further development of the company towards HELM 2030, our future framework.

**"HELM 2030 is the framework that sets the direction in which we want to grow HELM as a group. We are committed to developing a sustainable business with a positive impact – from a social, environmental and economic perspective."**

Stephan Schnabel, CEO
