AMPRION CONNECTS

Amprion GmbH is one of four transmission system operators in Germany. Our 11,000 kilometre-long extra-high voltage grid transports electricity in an area from the North Sea to the Alps. One third of Germany's economic output is generated there. Our lines are the lifelines of society: they secure jobs and quality of life for 29 million people. We keep the grid stable and secure - and are paving the way for a climate-neutral energy

system by expanding our grid. Around 3,100 employees in Dortmund and at more than 30 other locations help to keep the lights on. We also take on overarching tasks for the interconnected networks in Germany and Europe.
