ACCIONA commits to being a carbon-neutral company in 2016

The Company plans to invest 2,500 million dollars in renewable energy generation by 2020 - mainly in developing countries - to reach a total capacity of 10,500 MW. This will mean it will avoid the emission of over 20 million metric tons of CO₂ per year, equivalent to the emissions generated by over four million cars.

Along with its commitment to renewables, ACCIONA plans to relieve the stress on water resources and scarcity of water on the planet in 2020, through the construction of drinking water purification plants for five million people and sewage water treatment plants serving eight million.

SUSTAINABILITY MASTER PLAN 2020

SMP 2015 concluded successfully in all areas, permitting the drafting of a second plan, SMP 2020, with a positive mindset and the firm ambition of consolidating the sustainability practices supporting ACCIONA's business model.

The new Plan is structured according to strategic and operational objectives, and is being applied throughout the organization, with specifications for the different business lines in order to bring sustainability closer to the particular nature of each.
